

EDUCATION ACTION GROUP

*Bringing the Business
and Education
Communities Together*

The Education Action Group offers business professionals and citizens of Gwinnett the opportunity to become engaged in education issues as they intersect with the local business community. It encounters those on the front lines of education and helps to maintain Gwinnett's high standard of excellence in education. Whether you are a parent, have a passion for education, or own a business that is involved in the education arena, the Education Action Group has a place for you.

WHAT'S IN IT FOR YOU

- Help secure a quality workforce by ensuring Gwinnett's high standard of excellence in education
- Influence key decision-makers and witness first-hand the inner workings of the educational system
- Facilitate communication with those on the front lines of education at every level
- Promote business involvement in education by getting directly involved with area schools
- Promote life-long learning

HOW IT WORKS

The Education Action Committee works to achieve Goal Two of Partnership Gwinnett "Educational and Workforce Excellence".

Objective 1: Ensure the pre-k through 12th grade educational system is able to serve local needs

Objective 2: Maintain a demand-driven approach to education and training.

Subcommittees for each objective under Goal Two will support the action steps for Goal Two by offering programs to promote involvement between the business and educational communities.
